## CERTIFICATE OF RoHS COMPLIANCE

This is to certify that SN100CL and SN100CLe lead-free solders comply with the European Union RoHS requirements for all ingredients listed including Lead, Cadmium, Hexavalent Chromium, Mercury, PBB and PBDE.

Please be aware that SN100CL and SN100CLe solders do contain a trace amount of lead. The RoHS limit for lead is 0.10% by weight. SN100CL and SN100CLe are made from pure tin metal, which contains some lead as a natural contaminate. The lead level in fresh SN100CL and SN100CLe solders is typically 0.01 to 0.02% by weight.
